**Explanatory Note**

The implementation of Comprehensive Land Use Plans would require the enactment of regulatory measures to translate its planning goals and objectives into reality. A Zoning Ordinance is one such regulatory measure which is an important tool for the implementation of the Comprehensive Land Use Plan.

The Local Government Code of 1991, as amended, authorizes local government units to enact zoning ordinances subject to and in accordance with existing laws.

The Housing and Land Use Regulatory Board has rendered the technical assistance which is within their mandate to assist and coordinate the activities of the local government units in the preparation of comprehensive land use and zoning plans.

NOW, THEREFORE, on motion of Hon. Avila, Hon. Yangot, and Hon. Datuin, seconded by Hon. Fariñas, Hon. Alangsab, and Hon. Lawana,

BE IT ENACTED BY THE SANGGUNIANG PANLUNGSOD (CITY COUNCIL) IN  
SESSION ASSEMBLED THAT:

In case of loss, damage, destruction and/or extreme difficulty in the interpretation of the official zoning map, the *Sangguniang Panlungsod* may, by resolution, adopt a new official zoning map which likewise shall be in accordance with the development plan of the community; provided, that all prior maps or any significant parts thereof left shall be preserved together with all available records pertaining to their adoption and/or amendment.

**SECTION 7. Zone Boundaries.** The areas appearing in Appendix "B" hereof constitute the Zoning Districts of the City of Baguio with the specific locations and boundaries of each zone so delineated. The textual description of the zone boundaries shall prevail over that of the Official Zoning Maps.

**SECTION 8. Interpretation of Zone Boundaries.** In the interpretation of the zone boundaries fixed for any of the zones shown in the Zoning Map, the following rules shall apply:

1. Where zone boundaries are so indicated that they approximately follow the center of streets or highways, street lines or highway right-of-way lines shall be construed to be boundaries;
2. Where zone boundaries are so indicated that they approximately follow the lot lines, such lot lines shall be construed to be boundaries;
3. Where zone boundaries are so indicated that they are approximately parallel to the center lines or right-of-way lines of streets and highways, such zone boundaries shall be construed as being parallel thereto and at such distance therefrom as indicated on the zoning map. If no distance is given, such dimension shall be determined by the use of the scale shown in said zoning map;
4. Where the boundary of a zone follows a stream, lake, or other bodies of water, said boundary lines shall be deemed to be at the limit of the political jurisdiction of the community unless otherwise indicated;
5. Boundaries indicated as approximately following the center lines of streams, rivers, canals, lakes, or other bodies of water shall be construed to follow such center lines. Boundaries indicated as parallel to, or extension of indicated features not specifically indicated in the zoning map shall be determined by the scale of the map;

7. Where a lot of one ownership, as of record at the effective date of this Ordinance, is divided by a district boundary line, the lot shall be construed to be within the district where the major portion of the lot is located. In case that the lot is bisected by the boundary line, it shall fall in the district where the principal use falls;
8. Where a district boundary is indicated as one-lot-deep, said depth shall be construed to be average lot depth of the lots involved within each particular city block. Where, however, any lot has a depth greater than said average, the remaining portion of said lot shall be construed as covered by the one-lot-deep zoning district if the remaining portion has an area less than fifty percent (50%) of the total area of the entire lot. If the remaining portion has an area equivalent to fifty percent or more of the total area of the lot, then the average lot depth shall apply to the lot which shall become a lot divided and covered by two or more different zoning districts, as the case may be; and
